

How to open the Mediaboard Content Package

A Mediaboard Content Package can be viewed when it is imported into the Mediaboard app. It will then appear as a new category.

You can download Mediaboard HD Touch FREE here:

<https://www.themediaboard.com/download-mediaboard>

Steps to import a content package from the computer:

1. Start Mediaboard and click on the community symbol in the left bottom corner.
2. In the next window, go the folder that contains the content package (zip) and select the package. Click "Open".
3. Click "Import" to start the import.

Steps to import a content package from the internet:

1. Right-click or long tap on the content package link in the web browser. Click in the menu on, "copy link or address".
2. Start your Mediaboard and click on the search icon (magnifying glass) in the top right corner. Paste the copied link using CTRL + V into the search field.
3. Click on "Import" to start the import process.
